

Cyber Threat Prioritization

FSSCC Threat and Vulnerability
Assessment Committee

Jay McAllister

October 1, 2014

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.					
1. REPORT DATE 01 OCT 2014		2. REPORT TYPE N/A		3. DATES COVERED -	
4. TITLE AND SUBTITLE Cyber Intelligence Threat Prioritization				5a. CONTRACT NUMBER	
				5b. GRANT NUMBER	
				5c. PROGRAM ELEMENT NUMBER	
6. AUTHOR(S) Jay McAllister				5d. PROJECT NUMBER	
				5e. TASK NUMBER	
				5f. WORK UNIT NUMBER	
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Software Engineering Institute Carnegie Mellon University Pittsburgh, PA 15213				8. PERFORMING ORGANIZATION REPORT NUMBER	
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)				10. SPONSOR/MONITOR'S ACRONYM(S)	
				11. SPONSOR/MONITOR'S REPORT NUMBER(S)	
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release, distribution unlimited					
13. SUPPLEMENTARY NOTES The original document contains color images.					
14. ABSTRACT					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT SAR	18. NUMBER OF PAGES 15	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified

Agenda

Background: Cyber Intelligence Tradecraft Project

Cyber Threat Prioritization

Future Development: Cyber Intelligence Research Consortium

Background: Cyber Intelligence Tradecraft Project

Cyber Intelligence Tradecraft Project

Sponsor

- National Intelligence Manager for Cyber, Office of the Director of National Intelligence (ODNI)

Purpose

- Study how organizations from industry, government, and academia perform cyber intelligence (methodologies, processes, tools, and training)

Definition of cyber intelligence

- The acquisition and analysis of information to identify, track, and predict cyber capabilities, intentions, and activities to offer courses of action that enhance decision making

Overall finding

- The most effective organizations balanced the need to protect their network perimeters with the need to look beyond them for strategic insights

Cyber threat baseline

Cyber Threat Prioritization

Q: How do you rank threats, from high to low?

**"We consider
everything a high
priority threat."**

- US government participant

Likelihood

Capability

An actor's sophistication, tools, and resources to execute a cyber attack determine their capability. Assessing capability as an independent variable of likelihood means organizations can avoid the pitfalls of devoting time and attention to "paper tiger" threats.

Intent

The actor's purpose and the expected outcome of the cyber attack determine the intent. Prioritizing actors by their intent allows analysts to focus on the most relevant threats.

Attack Methods

Humans are creatures of habit. Although threat actors take great care to avoid detection, at some level they too succumb to this adage. Tracking how threat actors operate exposes patterns that analysts can use to combat their effectiveness.

Resources

Understanding what is available to threat actors offers context to the sophistication of their attacks. Leverage government, industry, and intelligence service provider information sharing arrangements to learn about actors resources.

Motive

Why do threat actors attack? Determining an actor's motive provides insight into the possible direction of their behavior, and determines their interest in targeting the organization.

Targeted Data

Understanding what a threat actor is after will factor into determining their intent to target the organization.

Infrastructure

Technology

Coding

Maturity

Targets

Money

People

Tools

Training

Intrinsic (personally rewarding)

Extrinsic (receive external reward or avoid punishment)

Personally Identifiable Information (PII)

Research and Development

Business Process

Industrial Control Systems

Impact

Operations

Cyber attacks adversely affect an organization's day-to-day operations. Since the effects often are financially quantifiable, analysts can use dollar amounts to communicate the impact attacks have on how an organization functions.

Strategic Interests

Some impacts are harder to quantify, but they are no less important. Strategic interests capture the intangible aspects of the organization that can be affected by a cyber threat.

Direct Costs

Cyber attacks have a financial impact on organizations. Prioritizing threats according to their cost in terms of remediation and mitigation can resonate with technical and non-technical stakeholders.

Business Operations

In addition to the known costs of responding to an attack, organizations also should consider the cascading effects an attack can cause and their associated costs.

Organizational Interests

Plans, people, and products offer tremendous insight into why an organization is targeted and where a threat can do the most damage if certain information is compromised.

External Interests

Organizations do not operate in a bubble, and neither should threat prioritization. Consider the ramifications cyber attacks can have on organizational partnerships, reputation, culture, geopolitics, and market space.

- Incident Response

- Downtime

- Mitigation and/or Prevention

- Supply Chain

- Logistics

- Future Earnings

- Strategic Planning

- Stakeholders

- Organizational Culture

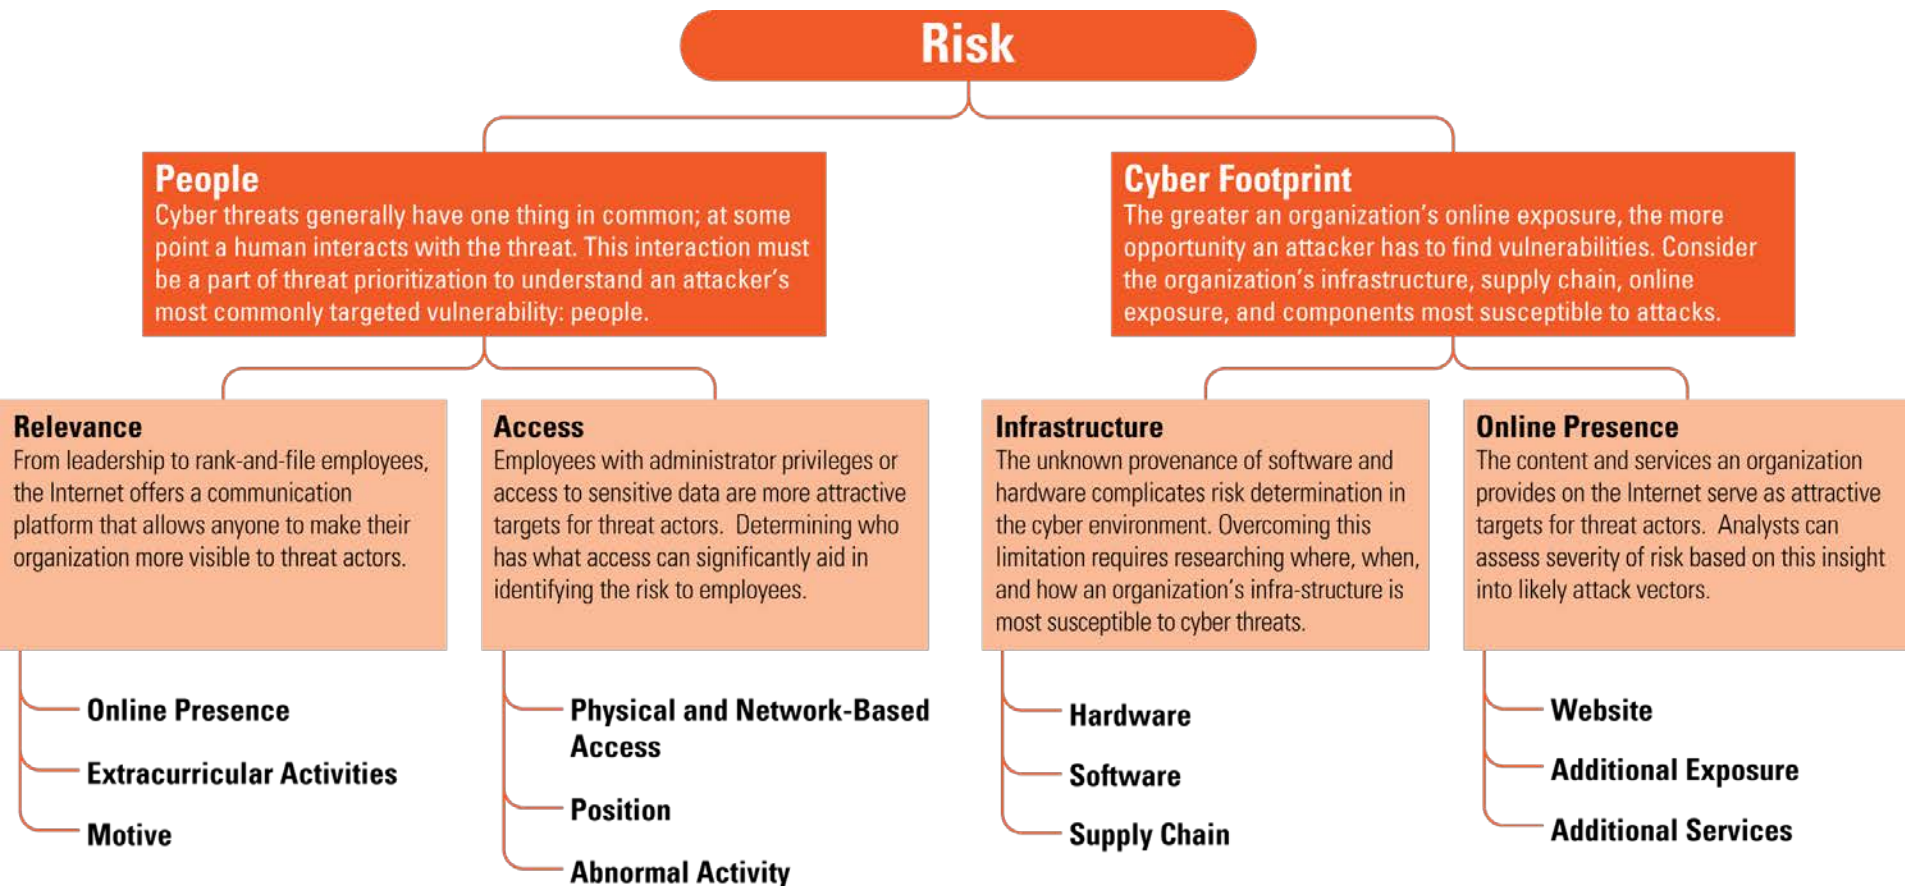

- Market/Industry

- Geopolitical

- Partnerships

- Brand Reputation

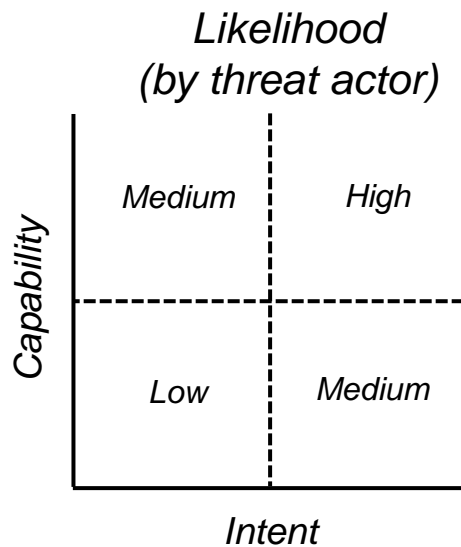

Implementing...

$$\text{Threat} = \text{Likelihood} + \text{Impact} + \text{Risk}$$

Future Development: Cyber Intelligence Research Consortium

Cyber Intelligence Research Consortium

Purpose

- Research and develop technical solutions and analytical practices to help people make better judgments and quicker decisions with cyber intelligence

Membership

- Decision makers and practitioners from academia, Department of Defense, defense contracting, energy, financial services, and the U.S. Intelligence Community

Offerings

- Cyber threat baseline: Threat environment research to identify best practices
- Tradecraft labs: Workshops to advance analytical & technological capabilities
- Implementation frameworks: How-to guides for key intelligence practices
- Crisis simulation: Capture-the-flag exercise to apply techniques & technologies
- Intelligence insights: Continuous communication on relevant topics
